Eco-gestures and Slow Life

In order to respect the environment, many things are designed in the house to limit our impact on nature and act in a sober and sustainable approach. For example, the recycling of materials, the sorting of waste (containers are at your disposal in the reserve on the ground floor), the recovery of rainwater or even the homemade production of cleaning products. I will happily share with you my Eco and Slow tips and tricks.

Wifi and television

There is no television in the house to encourage disconnection and sharing. Discussions, books and music are, however, freely exchangeable....As is the Wifi code for the network, available in the living area on the ground floor.

I ensure that your stay is an unforgettable experience that you will want to share again. It may happen that there are omissions or malfunctions. I will make it a point of honor to intervene as quickly as possible.
